

# [ supported server software ]

✓ = supported

✗ = not supported

● = IE5, Apache problem

Supported server software	SSL123 Certificates	SGC SuperCerts
<p>● <b>IE5.002919, IE5.002920</b> : These versions may not connect to a <b>thawte</b> SGC SuperCert on an Apache platform due to the browsers 56 bit/SGC implementation. Please upgrade to a recent version of Internet Explorer or disable the 56 bit ciphers in Apache using the workaround described at <a href="http://www.modssl.org">www.modssl.org</a>.</p>
